PROFESSIONAL SUMMARY

Driven Computer Science & Engineering student with hands-on experience in **Python**, **Cloud Services (AWS EC2, IAM)**, **Docker**, and automated **CI/CD pipelines**. Skilled in leveraging AI-assisted development tools to write efficient code, manage relational databases like **PostgreSQL**, and optimize cloud application workflows. Seeking to bring strong scripting, version control, and infrastructure engineering skills to the **CloudOps Engineering Intern** role at Chegg.

EDUCATION

- **Andhra Loyola Institute of Engineering and Technology (JNTU-Kakinada)** Vijayawada, AP
B.Tech in Computer Science & Engineering (AI & ML) – CGPA: 9.2/10 2024 – 2027
- **Sri Venkatesa Perumal College of Engineering and Technology** Puttur, AP
Diploma in Computer Engineering – Overall Percentage: 88% 2021 – 2024

TECHNICAL SKILLS

Languages & Scripting: Python, SQL, C, C++
Cloud & Infrastructure: AWS (EC2, IAM, Basic Cloud Services), **Docker**, **CI/CD Pipelines**, **Jenkins**, SonarQube
Databases & Tools: **PostgreSQL**, **Git**, GitHub, Linux Shell/Bash Scripting, VS Code
Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPs), Networking Fundamentals

EXPERIENCE & TECHNICAL TRAINING

- **Edunet Foundation (AICTE) In Collaboration with IBM SkillsBuild** Remote
Artificial Intelligence & Machine Learning Intern Jun 2025 – Jul 2025
 - Engineered end-to-end data workflows and automated execution processes using **Python**.
 - Utilized modern developmental tools and AI-assisted methodologies to accelerate script optimization, model testing, and execution tracking.
 - Managed project repositories using **Git** and version control workflows to collaborate on continuous updates.
- **MSME - RAMP Programme** Vijayawada, AP
Cybersecurity Workshops Attendee Recent
 - Gained tactical knowledge on system hardening protocols, network diagnostic tools, and identity/access hygiene.
 - Evaluated vulnerability assessments across network vectors to improve system security posture.

KEY PROJECTS

AI-Based Mock Interview Platform

Behavior Analysis & Performance Reporting

- Developed an interactive AI-driven interview system that assesses candidate demeanor and non-verbal cues during practice sessions.
- Implemented real-time computer vision logic to track user eye gaze, camera alignment, and overall posture to measure candidate focus and confidence levels.
- Engineered an automated reporting engine to aggregate behavioral metrics and generate detailed performance summaries post-interview.
- Integrated a continuous integration and code quality pipeline using **GitHub Actions** and **SonarQube** for continuous code analysis and test automation.

Employee Salary Prediction System

Machine Learning & Interactive Web App

- Built a end-to-end binary classification model to predict whether an employee's salary exceeds or falls below \$50,000 based on demographic and professional features.
- Trained, evaluated, and fine-tuned multiple supervised classification algorithms to achieve optimal predictive accuracy and feature importance.
- Developed an intuitive, responsive frontend interface using **Streamlit** to allow users to input input parameters and receive instant predictions.
- Enforced continuous code quality standards, static analysis, and version control workflows leveraging **GitHub** and **SonarQube**.

ACHIEVEMENTS & CERTIFICATIONS

- **NPTEL Certification:** Ranked in the Top 2% nation-wide in Human-Computer Interaction (HCI).
- **IBM SkillsBuild:** Official Certification in AI Workflow Architecture & Data Engineering.
- **Academic Excellence:** Maintained a top-tier CGPA of 9.2 in B.Tech program.
